

Ideation Phase

Brainstorm & Idea Prioritization Template

Field	Details
Date	2 October 2026
Team Name	Streamlining IT Procurement: Automating Standard Laptop Orders with flow designer
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with flow designer
Maximum Marks	4 Marks

Overview & Guidelines

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem-solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step 1: Team Gathering, Collaboration and Select the Problem Statement

- **Preparation (10 minutes):** Define who should participate, set the goals, and learn facilitation tools.
- **Define Problem Statement (5 minutes):** Frame your problem as a "How Might We" statement.

Problem Statement: How might we streamline IT procurement by automating standard laptop orders using Flow Designer to reduce processing times and manual errors?

Key Rules of Brainstorming:

1. Stay on topic.
2. Defer judgment.
3. Go for volume.
4. Encourage wild ideas.
5. Listen to others.
6. Be visual where possible.

Step 2: Brainstorm, Idea Listing and Grouping

- **Brainstorm (10 minutes):** Write down any ideas that come to mind that address your problem statement.
- **Group Ideas (20 minutes):** Cluster similar or related notes. Give each cluster a sentence-like label.

Idea Categories:

- **Trigger Automation:** Auto-submit requests upon catalog selection; auto-check inventory levels.
- **Approval Workflows:** Auto-approve requests under a specific budget threshold; send automated manager approval reminders via Chat/Email.
- **Fulfillment & Integration:** Integrate Flow Designer with asset management tools; generate automated Catalog Tasks and assign them to the Hardware group upon approval.

Step 3: Idea Prioritization Grid

Evaluate your ideas on an **Importance vs. Feasibility** matrix:

- **Importance (Vertical Axis):** If done without difficulty/cost, which has the most positive impact?
- **Feasibility (Horizontal Axis):** Which tasks are easiest/most feasible regarding cost, time, effort, and complexity?

Selected Core Solution:

- Implement an end-to-end automated laptop procurement workflow in Flow Designer, handling automated approvals, Catalog Task creation, user notification, and assignment to the Hardware team.
