Problem Statement 1 (PS-1)

- **I am:** an IT Administrator managing procurement tasks
- **I'm trying to:** route and fulfill approved standard laptop requests to the Hardware team quickly
- **But:** manual task creation and manual group routing slow down the procurement process
- **Because:** request workflows rely on manual intervention rather than automated approvals and triggering
- **Which makes me feel:** overwhelmed and inefficient

Problem Statement 2 (PS-2)

- **I am:** an employee requesting a standard company laptop
- **I'm trying to:** receive my configured laptop quickly after submitting a service request
- **But:** standard laptop requests face unnecessary processing delays before reaching the configuration stage
- **Because:** there is no automated flow to instantly create catalog tasks and assign them to the Hardware assignment group upon approval
- **Which makes me feel:** frustrated and delayed in getting work done
