

Project Design Phase-II

Data Flow Diagram & User Stories

Date: 02 October 2026

Team ID: PNT2022TMIDxxxxxx

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Maximum Marks: 4 Marks

Data Flow Diagram (DFD) - Process Flow

1. **User Request Submission:** End-User accesses the ServiceNow Service Catalog, selects the Standard Laptop catalog item, fills in required fields, and submits the order.
2. **Approval Trigger:** The system generates a Service Request (`sc_request`) and initiates an approval workflow, setting the state to 'Awaiting Approval'.
3. **Approval Event Processing:** Approver approves the request, which sends an event signal to ServiceNow Flow Designer.
4. **Flow Execution & Task Creation:** Flow Designer executes automatically post-approval, dynamically updates the short description, generates a Catalog Task (`sc_task`), and sets the Assignment Group to **Hardware**.
5. **Task Fulfillment & Status Sync:** Hardware team fulfills the task, updating the record status, which triggers an automated notification back to the requester.

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
-----------	-------------------------------	-------------------	-------------------	---------------------	----------	---------

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
Requester (Employee)	Service Catalog Ordering	USN-1	As an employee, I want to select a Standard Laptop from the Service Catalog and submit my order with justifications so that I can receive necessary hardware.	Catalog item form validates inputs and generates a Service Request upon submission.	High	Sprint-1
Approver (Manager)	Request Approval	USN-2	As a manager, I want to receive approval requests for laptop orders so that I can review and authorize equipment requests for my team.	Approver receives notifications and can approve or reject the request via the portal.	High	Sprint-1
System / Flow Designer	Automated Task Generation	USN-3	As a system process, I want to automatically create a Catalog Task upon request approval so that manual	Flow Designer triggers immediately post-approval and generates a Catalog Task without	High	Sprint-1

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
			task creation is eliminated.	manual intervention.		
System / Flow Designer	Dynamic Task Configuration	USN-4	As a system process, I want to update the short description and assign the task to the Hardware group so that the correct team fulfills it.	Catalog Task short description is updated dynamically and the Assignment Group field is set to 'Hardware'.	High	Sprint-2
IT Support (Hardware Team)	Task Fulfillment	USN-5	As a Hardware team member, I want to view assigned catalog tasks in our group queue so that I can process laptop fulfillment efficiently.	Task appears in the Hardware group queue with clear order details and updated short descriptions.	Medium	Sprint-2
