

1. Functional Requirements (FR)

- **FR-1 (Service Catalog Submission):** Enables users to select a Standard Laptop, populate required delivery/user fields, and submit a Requested Item (RITM).

DOCX

- **FR-2 (Manager Approval Routing):** Automates manager approval triggers upon request submission with direct email approval actions.

DOCX

- **FR-3 (Automated Task Creation):** Flow Designer automatically creates a Catalog Task (SCTASK) upon approval and updates the short description dynamically.

DOCX

- **FR-4 (Assignment & Routing):** Automatically routes the task to the **Hardware** assignment group and notifies technicians.

DOCX

- **FR-5 (Fulfillment & Completion):** Hardware team completes configuration, setting task and parent RITM states to **Closed Complete**.

DOCX

2. Non-Functional Requirements (NFR)

- **NFR-1 (Usability):** Intuitive ordering interface requiring 3 clicks or fewer with clear notifications.

DOCX

- **NFR-2 (Security):** Role-Based Access Control (RBAC) ensuring only authorized ITIL roles update procurement tasks.

DOCX

- **NFR-3 (Reliability):** 100% trigger accuracy with zero dropped or duplicate task creations.

DOCX

- **NFR-4 (Performance):** Task creation and assignment complete within 5 seconds of approval.

DOCX

- **NFR-5 (Availability):** 24/7 operational availability matching 99.9% platform uptime.

DOCX

- **NFR-6 (Scalability):** Built to handle peak volume spikes during onboarding windows smoothly.
