

Project Design Phase

Problem - Solution Fit Template

Date: 02 October 2026

Team ID: PNT2022TMIDxxxxxx

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Maximum Marks: 2 Marks

Canvas Breakdown

1. CUSTOMER SEGMENT(S) [CS]

- Enterprise IT Service Desk Analysts, IT Managers, Procurement Officers, and Employees submitting standard hardware catalog orders.

2. JOBS-TO-BE-DONE / PROBLEMS [J&P]

- Automate laptop task generation once request reaches approval.
- Eliminate manual task creation, reduce processing turnaround times, and assign tasks to the **Hardware** group automatically.

3. TRIGGERS [TR]

- An employee submits a Standard Laptop request via the ServiceNow Service Portal.
- Request reaches the configured approval state ('Approved').

4. EMOTIONS: BEFORE / AFTER [EM]

- **Before:** Frustrated by procurement delays, uncertain about order progress, stressed over manual routing errors.
- **After:** Confident, relieved, in control with automated, predictable task fulfillment and instant status updates.

5. AVAILABLE SOLUTIONS [AS]

- **Manual Order Processing:** Service Desk manually reviews requests and creates tasks in ServiceNow (Slow & error-prone).
- **Legacy Workflow Editor:** Older scripts requiring complex maintenance and high overhead.

6. CUSTOMER CONSTRAINTS [CC]

- Strict Service Level Agreements (SLAs) for employee equipment onboarding.
- Limited support personnel to handle administrative task entries.

7. BEHAVIOUR [BE]

- Requesters check order status repeatedly on the portal.
- Support teams manually check unassigned task queues to pick up laptop orders.

8. CHANNELS OF BEHAVIOUR [CH]

- **Online:** ServiceNow Service Portal, Flow Designer, Email & System Notifications.
- **Offline:** Physical IT depot equipment provisioning and handoffs.

9. PROBLEM ROOT CAUSE [RC]

- Lack of automated orchestration between request approval conditions and catalog task creation, causing unnecessary processing bottlenecks.

10. YOUR SOLUTION [SL]

- **Standard Laptop Task Flow:** An automated Flow Designer workflow in ServiceNow that triggers automatically post-approval, creates a Catalog Task under the Requested Item, dynamically sets the short description, and assigns it directly to the **Hardware** group.
