

Problem-Solution Fit Canvas 2.0

Date: 02 October 2026

Team ID: PNT2022TMIDxxxxxx

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Maximum Marks: 100 Marks

Canvas Breakdown

1. CUSTOMER SEGMENT(S)

- **Target Users:** Enterprise IT Service Desk Analysts, IT Managers, Procurement Officers, and Employees requesting standard hardware equipment.

2. JOBS-TO-BE-DONE / PROBLEMS

- Procure standard laptop equipment efficiently upon approval.
- Automatically create and assign Catalog Tasks to the correct fulfillment group (**Hardware**) without manual intervention.
- Provide clear status visibility and dynamic updates for catalog request items.

3. TRIGGERS

- An employee submits a Standard Laptop request via the ServiceNow Service Portal.
- A line manager or department head approves the pending catalog request.

4. EMOTIONS: BEFORE / AFTER

- **Before:** Frustrated, anxious about delays, insecure about missing or unassigned fulfillment tasks.
- **After:** Confident, satisfied, in control with instant task creation and clear fulfillment visibility.

5. AVAILABLE SOLUTIONS & ALTERNATIVES

- **Manual Workflow Handling:** IT service desk manually reads approved requests and manually creates catalog tasks (Slow, error-prone).
- **Legacy Workflow Editor:** Older ServiceNow workflows that require complex scripting and maintenance overhead.

6. CUSTOMER CONSTRAINTS

- Strict SLA time windows for hardware delivery during employee onboarding.
- Limited IT support personnel available for manual administrative data entry.

7. BEHAVIOUR

- Requesters check order status repeatedly on the Service Portal.
- Support teams manually check unassigned task queues to pick up laptop orders.

8. CHANNELS OF BEHAVIOUR

- **8.1 Online:** ServiceNow Service Portal, Flow Designer, Email/Instance Notifications.
- **8.2 Offline:** Physical IT hardware store/depot handoffs and asset inventory tracking.

9. PROBLEM ROOT CAUSE

- Lack of automated orchestration between request approval conditions and task creation events, leading to bottlenecks and manual overhead.

10. YOUR SOLUTION

- **Flow Designer Automation ("Standard Laptop Task Flow"):** An automated ServiceNow flow that triggers immediately upon request approval, automatically generates a Catalog Task under the Requested Item, dynamically sets the short description, and routes it directly to the **Hardware** assignment group.
